

The Master Key System was originally written by Charles Haanel in 1912. This "translation" of the Master Key System was written to modernize and clarify the powerful message found in the original text. This 24-part correspondence course gives the student tools to enable them reach their highest potential. It is based on a system of beliefs that are centered on mankind's unity with God. The system is focused on putting the student in harmony with the Creator to access His help. Learning, understanding and living by true principles and Universal laws will unlock possibilities that seem supernatural to those who do not understand its teachings. After thoroughly studying the passages, the student will achieve a greater understanding of the Law of Attraction. This will allow the student to "magnetically" bring the help that is needed for their greatest benefit and learning. Each Part (or chapter) ends with an exercise, which is a meditation with a specific goal in mind. These teachings, together with the mental exercises, will increase the student's creativity and visualization skills. Their faith in themselves and God will increase and they will have a better understanding of what they truly want. It also teaches the importance of working for the good of all and how selfish living will bring destruction and loss. The Master Key system, together with the The Science of Getting Rich, by Wallace D. Wattles, was the inspiration behind the well-known movie and book series known as The Secret written and produced by Rhonda Byrne. She was introduced to these books during a period of trial in her life and found success and happiness through applying what she learned. It has been said that Charles Haanel received a letter from Napoleon Hill in 1919, thanking him for what he learned by studying The Master Key System. Napoleon Hill later wrote the book Think and Grow Rich, which is one of the most successful books of all time. His book teaches similar principles, which guide students to success and achievement. It has been rumored that some of the most successful people of our time have used this system to achieve riches, fame and success. It has been said that if you want to achieve success on the same level as the masters, do not study them, study what they studied.
