

Total Burn Care is a unique book that considers the complex management of burned patients from injury through to rehabilitation. This new edition covers the advances in the treatment of burns as well as the clinical, physical, psychological and social needs of the burn patient. In particular, the book discusses how to devise an integrated treatment programme for the optimal recovery and rehabilitation of patients. Total Burn Care is an essential reference source for anesthesiologists, intensivists, burn nurses and all health professionals in the burn care team.
