

This fantastic series links scientific enquiry and investigations to the exciting advances in modern science and technology today. Focusing on recent key scientific discoveries and breakthroughs, the books examine how these advances have come about, the ideas behind them and their subsequent development. It discusses the controversies surrounding the latest advances, developing critical thinking. It includes What is the future sections - looking at where the theory is taking us, what is being worked on and making predictions about what might be the next big breakthrough. It features Making the connection boxes - how various ideas were turned into scientific breakthroughs. It contains timelines, brief biographies of the big names involved, other explanatory diagrams and photography.
